

NEWS RELEASE

OLIGO Lichttechnik GmbH expanding the field of activity RSL – A NEW PARTNER FOR CHALLENGING PROJECT-FOCUSSED SOLUTIONS

OLIGO Lichttechnik GmbH is expanding its portfolio by welcoming aboard yet another renowned partner offering outstanding customized luminaires as project based solutions.

At the beginning of the year 2017 OLIGO Lichttechnik GmbH took over the company based in Sankt Augustin, a former member of Trilux group. Thus, OLIGO is further expanding its already profound expertise in the area of innovative lighting solutions by multiplying synergy effects within its divisions.

Following this latest acquisition of RSL, OLIGO's portfolio now comprises three core business areas: the two existing divisions – one specializing in light-based surface control and colour matching for industrial and auto-motive clients (OLIGO surface controls) and one specializing in premium luminaires for home and business environments (OLIGO Lichttechnik), have now been complemented by RSL, a brand offering individually, hence "project" manufactured premium luminaires. We have now become a one-stop-shop capable to supply premium quality and trend-setting lighting products across the range – be it standard, customized or multi-functional project-based solutions.

With immediate effect Mr. Thomas Dulas, the CEO and managing director of the two German founding companies of the OLIGO group, i.e. surface controls in Lenzen and OLIGO Lichttechnik in Hennef, is also in charge of affairs at the newly found ROL Lichttechnik GmbH in Sankt Augustin.

„Made in Germany“ will remain the foremost quality feature of the entire OLIGO product range. All our divisions and departments design, develop and manufacture in Germany exclusively. With its cutting edge technology – CNC machines, sheet metal chamfering, wet painting cabins, powder coating – and its test laboratories, RSL perfectly complements our business philosophy. Manufacturing expertise and short reaction times are, alongside short communication paths and utmost flexibility when cooperating with designers and architects, crucial ingredients in the deadline focused project business.

OLIGO Lichttechnik

Founded in 1987, OLIGO Lichttechnik has become one of the most innovative companies in the lighting industry. At our site in Hennef near Bonn in Germany, round about 100 employees manufacture premium quality single and system luminaires for home and business environments. OLIGO lighting solutions are not only synonymous of smart technology and contemporary efficiency but are also a paragon of premium lighting quality. Architects, designers and constructors appreciate the filigree aesthetics of our products and the company's paramount quality standards.

ROL Lichttechnik

RSL was founded in 1956 and has been manufacturing premium quality luminaires satisfying even the most demanding architectural requirements. RSL acts as a partner offering custom made lighting solutions to architects and designers accompanying them from the planning phase through development and construction stages all the way to final installation. The company's lighting solutions provide perfect lighting scenarios in museums, libraries, administrative buildings or hotels. In cooperation with international architects the company from Sankt Augustin near Bonn in Germany has gained an excellent reputation particularly due to various spectacular projects in Arabic speaking countries.

OLIGO surface controls

A specialist for innovative lighting technology and picture processing, OLIGO surface controls offers solutions for visual and digital systems allowing a highly precise surface control in industrial production. Furthermore, the company develops and manufactures ColorMatchingSystems capable of identifying differences in colour nuances of individually and serially produced parts and components. Its clients are world leading manufacturers in automotive, steel, furniture, polymere, ceramics and paper industries. The company has two locations in Germany – Lenzen in Brandenburg and Gersthofen in Bavaria.
